

Progressive Due Diligence

Build investor confidence. Accelerate funding.

Turn investor concerns into investor confidence — a guided program that prepares and positions your company for institutional investment.

Most great companies don't get funded because they aren't diligence-ready. **Progressive Due Diligence** is a structured, round-over-round engagement — typically six to eight weeks — that finds and fixes the gaps investors worry about most, **before they become deal-breakers**. AI on the ORQO platform reads your whole data room each round; our human experts steer the analysis and the coaching.

- Improve readiness
- Reduce risk
- Increase confidence
- Raise more capital

THE ENGAGEMENT

Three phases, round over round

PHASE 01

Discovery & Initial Review

A full baseline assessment across the areas investors scrutinize.

- Gap analysis & risk identification
- Investor-confidence baseline score
- Strategic improvement roadmap

PHASE 02

Strategic Correction & Enhancement

Guided improvements that strengthen weak spots, round over round.

- Narrative, deck & financial-model refinement
- Data-room & governance strengthening
- Ongoing coaching & expert review

PHASE 03

Validation & Final Review

Re-assess, validate the gains, and prove the progress.

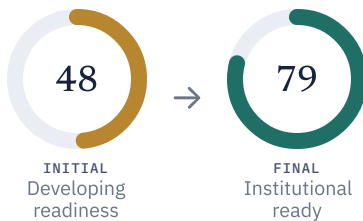

- Re-assessment & before/after scoring
- Remaining-risk analysis
- Final validation report

A full report lands every round. You receive a comprehensive investor-readiness report — anchored to your first-round baseline — that shows exactly what improved, where, and why your confidence score moved: section by section, with the evidence behind every change.

THE RESULT

Measured, not asserted

Illustrative scores (0–100), re-scored against the same rubric each round.

TRADITIONAL DUE DILIGENCE

- × One-time evaluation
- × Identifies problems
- × Static assessment
- × No improvement guidance

PROGRESSIVE DUE DILIGENCE

- ✓ Multi-phase improvement process
- ✓ Strategic correction guidance
- ✓ Measurable progress tracking
- ✓ Validated, investor-ready gains

IDEAL FOR

- ✓ Seed to Series A companies
- ✓ MedTech, BioTech, DeepTech, AI
- ✓ Pre-revenue & early-revenue
- ✓ Teams preparing for institutional funding
- ✓ Companies receiving mixed investor feedback

Let's build investor confidence — **together.**

Start a short conversation about getting your company investor-ready and raising with confidence.
